Summerton.

Those people who have been lambasting the State Warehouse System and its Commissioner, and endeavoring to prejudice the minds of the people by claiming its object was to build up a political machine, had better put out a candidate for the State Senate, while we have three good men offering for this position, but each of them already at the request of the people have de clared they were in favor of the warehouse system, now if two able lawvers. and one scientific farmer, after making a close study of this warehouse system can see it will be a great benefit to the masses, why should it be fought any longer. While Mr. DuRant says he never has been a political supporter o the present warehouse commission r,bu i' elected he would co-operate with Mr McLaurin in the passage of such laws

as will perfect the warehouse system. Mr. Wideman, also makes a very lengthly statement relative to the State warehouse system, and says he would prefer to see the present Commissioner handle the warehouse prop gator without provocation attack a osition, believing as he does that he is man? This question was answered in the most competent man in the State And it is generally known that for a

ong time, Mr. Dingle has been a strong advocate of the State warehouse close personal and political friend of Mr. McLaurin, the present Commis-sioner, and if elected would doubtless co-operate with him in every way pos sible to give to the people of South Car The young men of the Methodist

BUILDERS OF

GOVERNMENT. CONGRESS SHOULD GIVE THEM PREFERENCE IN APPRO-

PRIATIONS:

By Peter Radford. This nation is now entering upon an era of marine development. The wreckage of European commerce has drifted to our shores and the world war is making unprecedented demands for the products of farm and factory. In transportation facilities on land we lead the world but our port facilities are inadequate, and our flag is seldom seen in foreign ports. If our government would only divert the energy we have displayed in conquering the railroads to mastering the commerce of the sea, a foreign bottom would be unknown on the ocean's highways. This article will be confined to

discussion of our ports for the products of the farm must pass over our wharfs before reaching the water. We have in this nation 51 ports, of which 41 are on the Atlantic and 10 are on the Pacific Coast. The Sixty-second Congress appropriated over \$51,000,-000 for improving our Rivers and Harbors and private enterprise levies a toll of approximately \$50,000,000 annually in wharfage and charges for which no tangible service is rendered. The latter item should be lifted off the backs of the farmer of this nation and this can be done by Congress directing its appropriations to ports that are free where vessels can tie up to a wharf and discharge her cargo free of any fee or charge.

A free port is progress. It takes out the unnecessary link in the chain of transactions in commerce which has for centuries laid a heavy hand upon commerce. No movement is so heavily laden with results or will more widely and equally distribute its benefits as that of a free port and none can be more easily and effectively secured.

THE VITAL PROBLEM **AGRICULTURE**

By Peter Radford. There is no escaping the market problem and the highest development of agriculture will not be attained until it is solved, for a market is as necessary for the producer as land on which to grow his crop.

Governmental and educational institutions have spent \$180,000,000 in the United States during the past ten years for improving soil production and improving seeds and plants, but very little attention and less money has been given to the marketing side of agriculture.

The problem is a monumental one which will never be solved until it gets within the grasp of a experience and wisdom of the age farmers, merchants, bankers, editors and statesmen must unite in solving. The Farmers' Union stands for all

there is in farming from the most scientific methods of seed selection to plans of marketing, but does not believe in promoting one to the neglect of the other. We consider the work we ask that governmental and commercial agencies seeking to help us, continue to give us their assistance influence should be extended to the marketing side of our farm problems

We cannot hope to develop manufacturing by over-production of the factory; we cannot build up mercantile enterprises by the merchants loading their shelves with surplus goods anti. A candidate with political deliand no more can we develop agricul- rium tremens, a preacher with polititure by glutting the market with a surplus of products.

DARIUS

The neigh of a horse made Darius King of Persia, the six contending powers for the throne agreeing among themselves that the one whose horse should neigh first should possess the kingdom. This ancient method of settling disputes among politicians could be revived with profit today. If our partisan factions and petty politicians could only settle their disputes by the neigh of a horse, the bark of a dog or the bray of a donkey, it would be a great blessing and would give our citizens a better opportunity to pursue the vocations of industry free from political strife.

Let those who pick political plums by raising rows and who flash swords dripping in the blood of industry understand that they cannot turn the public forum into a political arena and by a clash of personal aspirations still the hammer and stop the plow and that their quarrels must be settled in the back alleys of civilization.

POLITICIANS WHO CAPITALIZE STRIFE A MENACE TO

Neglect of Agricultural and Industria Opportunities a National Crime.

By Peter Radford.

There never was a time in the his tory of this nation when we needed statesmen more or agitators less than at the present moment. The opportunities now afforded us on land and sea demand the best there is in statecraft and the possibilities that are confronting us call for national issues that units the people, build industry and expand trade. The agricultural and industrial development of this nation has suffered severely at the hands of agitators who have sent torpedoes crashing into the port side interests of the farmer makes them little less than political criminals. We want no more of these evil spirits to predominate in government. Too long their hysterical cry has sent a shiver down the spinal column of industry. Too long have the political agitators capitalized strife, pillaged progress and murdered opportunity. An industrial corpse is not a desirable thing, a crippled business an achievement or neglect an complishment about which any representative of the government has a right to boast. Issues that Breed Agitators Should be

Eliminated.

The political agitator must be eliminated from public life before thoughtful consideration can be given to a constructive program in government. The liquor question is the most prolific breeding ground for agitators and whether pro or anti, the hatch is equally as undesirable. This article is in no sense a discussion of the liquor question but deals solely and by way of illustration with the political products of that issue. Other subjects will be dealt with in the order of their importance.

In the history of our government the liquor issue has never produced a constructive statesman worth mentioning and it never will. It has sent more freaks to Congress. Lilliputians to the Senate and incompetents to office than any other political issue under the sun.

The recent experience of the English Parliament which lashed itself into a fury over the liquor question has a lesson that it is well for the farmers of this nation to observe; for the subject in some form or other is constantly before the public for solution and offtimes to the exclusion of more important problems to the American plowmen.

Too Many Political Drunkards.

their country a service by climbing upon it. It is a problem which the on the water wagon or signing a pledge of political temperance. Too often our legislative halls are turned into political bar rooms and many of the members become intoxicated on liquor discussions. We have too many politthe most systematic and profitable ical drunkards-pro and anti-in our public affairs. No one who is a slave to the political liquor habit is quite so capable of dealing with the busiof farm demonstrators valuable and ress affairs of government as the sober and industrious. We have few public men in this day who are strong enough to resist the temptation of and advice, but we believe that their strong drink politically and when the demon Rum once becomes firmly entrenched in the mind of a politician, he is less capable of meeting the demands for constructive statesmanship now confronting this nation.

We have in this country too many red-nosed politicians-both pro and cal snakes in his boots and an agitator drunk on the liquor question are the saddest sights in civilization and they should all be forced to take the political Keeley Cure.

It is far more important in government to make it easier for those who toil to eat than to make it more difficult for a few topers to drink. There is not one person in one hundred of our rural population that ever touches liquor but we all cat three times a

THE LAYMAN'S DUTY

day.

There never was a time when preachers and politicians formed an unholy alliance that civilization did not shrick out and Christianity cry aloud. Since the beginning of government, politicians have sought to decoy the ministry into the meshes of politics and make them carry banners in political processions. They have taken the ministry to the mountaintop of power and offered to make them monarch of all they surveyed, and while most of them have said, "Get thee behind me Satan," a few have fallen with a crash that has shaken every pulpit in Christendom.

Why Every Acre of Cow Peas Should Be Inoculated

What the Berckmans Sav About Cow Pea Inoculation-Facts That Read Like Fiction. Wonderful Results With Oats Following Inoculated Cow Peas-Remarkable Returns in Money Value of Cow Peas and Permanent Benelit to Soil

After years of intelligent toil, when lafter cow peas inoculated with his cul- | told that liming lime-deficient soils P. J. A. Berckmans of Augusta, Ga, ture. No claim that we would get such increases the value of artificial inocuwas gathered to his fathers, he left an increase was made, and we were led lation, but we did not use lime where behind him an enviable reputation as a nost useful citizen, as a noted horti- expect. culturist, a great nursury business, and three sons to carry on the work he had inaugurated-a business which had its customers in every civilized

land, for the Berckmans nursery prowhat the firm declared them to be. There was no guess work about anything they sold. They knew the possitree, shrub or plant that went forth from their establishment.

The businesss tarted by the revered of business and whose neglect of the P. J A. Berckmars has far outgrown the business left by him. In addition the activities of the sens have caused them to branch out in several other directions, and among their ventures is a fifteen hundred acre farm at Mayfield, half of which is given over to the row where the soil had been inocupeach orchards and the other half to lated, so much more vigorous were the the air and make the locked up plant general farming.

This farm, "The Oaks," located at Mayfield in Hancock county, Ga., is being brought up to high productiveness through the application of tenance of soil fertility, and a record and for this small expenditure we got a treated with FARMOGERM, but the underlying principles of the mainoat crop grown this year on sandy land under drought conditions has pointed so conclusively to the money value of the inoculation of legumes that this year the Berckmans Brothers are using more than 300 acres of inoculating material on cow peas alone. In discussing the remarkable yield of oats. Mr. P. J. A. Berckmans, Jr.,

"For years we have grown cow peas with what we believed to be success, as a means of increasing the fertility of the land as well as for the excellent alize the fullest benefit from the inocu- of NITRO-CULTURE to the Departforage the crop provides. Some years ago we began testing out commercial bacteria cultures for the inoculation again to get the full benefit of last lina; and to the Department of Agriof hairy vetch, planted along wite oats, and some of them proved decidedly successful, while the hay was easily the best ever fed on our place. This test was made on the orchard section spent for the 135 acres of Farmogerm. of The Oaks, and it was observed by all that the mules on that part of the planthe farm section, where mixed grain our farms. and forage were fed. Crops grew better after the inoculated vetch, showing the increase in nitrates and the general improvement of the soils. "In the summer of 1914, the repre-

In every State, City, Town and Hamlet in the United States You Can Get Delicious and Refreshing

ALSO IN CANADA, MEXICO, CUBA AND OTHER FOREIGN COUNTRIES

COCA COLA IS SOLD IN THE GREAT CITY

PRICE THE SAME EVERYWHERE 5c. IN BOTTLES.

Indeed it is well termed "The Nations's Most Popular Soft Drink."

Thoroughly Carbonated and Perfectly Blended, A Drink of Quality, Distinctly All Its Own, Muchly Imitated, but Never Equalled. Call for it by Name. Make no mistake---Look for Trade-Mark Lettes.

On the Crown Cap of the Bottle--- None other is

Genuine. REMEMBER THE FREE TRIP TO THE GOLDEN WEST. SAVE OUR

CROWNS UNTIL JULY 3rd."
